Nos 17/18

SUBJECT GROUPS ACCORDING TO JOURNALS

- | | |
|--------------------------------------|---------------------------------------|
| 1. Anatomy; Histology | 26. Infectious Diseases; Epidemiology |
| 2. Anthropology; Ethnology | 27. Medicine |
| 3. Archeology; Paleontology | 28. Metabolism |
| 4. Aviation Medicine | 29. Military and Naval Medicine |
| 5. Bacteriology; Parasitology | 30. Miscellaneous |
| 6. Biology; Embryology | 31. Neurology; Psychiatry |
| 7. Bone; Joint; Extremities; Muscle | 32. Nursing |
| 8. Cancerology | 33. Ophthalmology |
| 9. Cardiovascular System | 34. Otorhinolaryngology; Phoniatry |
| 10. Chemistry; Physics | 35. Pathology |
| 11. Dentistry; Stomatology | 36. Pediatrics; Child Welfare |
| 12. Dermatology | 37. Pharmacology; Pharmacy |
| 13. Diagnosis; Clinical Methods | 38. Physiology |
| 14. Dietetics; Foods; Nutrition | 39. Psychology; Mental Hygiene |
| 15. Digestive System | 40. Public Health; Sanitation |
| 16. Endocrinology | 41. Radiology; Phototherapy |
| 17. Forensic Medicine; Toxicology | 42. Respiratory System |
| 18. Genetics; Eugenics | 43. Surgery; Traumatology |
| 19. Gynecology; Obstetrics | 44. Therapeutics |
| 20. Hematology | 45. Tropical Medicine |
| 21. History; Biography; Bibliography | 46. Tuberculosis |
| 22. Homeopathy; Osteopathy, etc. | 47. Urology |
| 23. Hospitals | 48. Venereal Diseases; Sexology |
| 24. Immunology; Serology | 49. Veterinary Medicine |
| 25. Industrial Hygiene; Sociology | 50. Zoology |

Privately published under the auspices of the

MEDICAL LIBRARY ASSOCIATION, INC.

AND THE

FRIENDS OF THE ARMY MEDICAL LIBRARY

Washington, D. C.

EXPLANATION

This double number of the Current List is the first one which combines in a single issue the material arriving over a two weeks period. Although this eventuality has been anticipated, it is the first time that it has actually occurred. The explanation is that due to the war emergency the total volume of medical literature is diminishing and also that a reorganization and physical rearrangement of the several departments of the Library recently made to improve the service have interfered with the regular routine of the work.

These changes have now been completed and it is expected that the interrupted recording of the literature in the Current List will be resumed and also that due to the increasing amount of it now being secured in the form of microfilm copies the coverage will be more complete than heretofore.

As mentioned on a previous occasion the tables of contents of journals received as microfilm copies are designated in the Current List by the word (microfilm) printed adjacent to the title of the periodical. In these cases microfilm copies will be supplied in the form of positives instead of negatives. Special equipment for making these has been perfected and it is expected that microfilm copying from this material will be equally as prompt and satisfactory as that from the original printed journals.

The Index to Volume 2 of the Current List which has just been mailed to all subscribers was delayed by circumstances which it is hoped will not prevail in the future. These may be ascribed to the initial organization of the work, loss of time through illness and the difficulty of finding typists who had time, in addition to their regular employment, to prepare the copy for the printer. This latter difficulty has resulted in the unevenness and frequent lack of clearness in the photographically reproduced printed copy which will undoubtedly be noted. In the future every effort will be made to overcome these imperfections and complete each succeeding index more promptly.

A.S.

CURRENT LIST OF MEDICAL LITERATURE is published weekly and lists of RECENT BOOK ACQUISITIONS are issued several times per year as supplements. The subscription price for both is \$5.00 per year in the United States and \$5.50 per year in other countries. The Recent Book Acquisition may be obtained separately at \$1.00 per year. 1. Anatomy; Histology

Tr. Am. Micr. Soc., 1942, 61: (Oct.)

- DAVIS, H.S. A suctorian parasite of the smallmouth black bass, with remarks on other suctorian parasites of fishes. 309-27.
- MILY, H.P. Development of the embryo sac of *Iris fulva* and *I. hexagona* var. *giganticaerulea*. 328-35.
- CHEATUM, E.P., LONGNECKER, M., & METLER, A. Limnological observations on an east Texas lake. 336-46.
- MATTEI, H.W. Monorchidae (trematoda) from fishes of Tortugas, Florida. 349-60.
- WOODARD, T.M., JR. Development of the nurse-cells of *Littorina irrorata* (Say). 361-72.
- VERGEESE, T. Two new pseudophyllidean tapeworms of general distribution in the Great Lake region. 373-82.
- ANDREWS, E.A. A folliculinid at Beaufort, North Carolina. 383-90.
- RISER, N.W. A new protocephalid from *Amphiuma tridactylum* Cuvier. 391-7.
- BEZDEK, H. Studies on the nematode *Soboliphysa baturini* Petrow, 1930. 398-403.

2. Anthropology; Ethnology

Am. J. Phys. Anthropol., 1943, n.ser., 1: (Mar.)

- STEGGENDA, M. Stature of South American Indians. 5-20.
- HEWMAN, M.T. A metric study of undeformed Indian crania from Peru. 21-45.
- STEWART, T.D. Skeletal remains from Paracas, Peru. 47-63.
- CARDELA, F.B. Blood group tests on tissues of Paracas mummies. 65-7.
- TROTTER, W. Hair from Paracas Indian mummies. 69-75.
- HEDLICKA, A. Skull of a midget, from Peru. 77-82.
- COLNSTEIN, M.S. Observations on Mexican crania. 83-93.
- SELTZER, C.C., & BROUHA, L. The masculine component and physical fitness. 95-106.

3. Bacteriology; Parasitology

Proc. Helminth. Soc. Washington, 1943, 10: (Jan.)

- SWANSON, L.E., & TAYLOR, A.L. Control of cattle-parasitic and free-living nematodes by soil fumigation with methyl bromide. 1-3.
- ANDREWS, J.S., TAYLOR, A.L., & SWANSON, L.E. Fumigation of soil with methyl bromide as a means of destroying infective stages and intermediate hosts of some internal parasites of mammals. 4-6.
- DIKMANS, G. The occurrence of *Viannia viannii* Travassos (Nematoda: Heligmosomidae) in opossums in North America. 6.
- DIKMANS, G. The lungworm, *Protostrongylus rushi* Dikmans, 1937, of the mountain sheep, *Ovis canadensis*. 8.
- PRICE, E.W. North American monogenetic trematodes: the family Discocotylidae (Discocotylidae). 10-15.
- DOUGHERTY, E.C. Notes on the lungworms of porpoises and their occurrence on the California coast. 16-22.

SARLES, M.P. Overwinter loss of *Haemonchus contortus* larvae from a sheep pasture. 22.

- KATES, K.C. Overwinter survival on pasture of preparasitic stages of some nematodes parasitic in sheep. 23-5.
- ZIMMERMAN, H.E., JR. The occurrence of swine ascarid eggs in the intestinal contents and in the dropping of wild rats. 25.
- MORGAN, B.B. Inoculation of *Trichomonas foetus* (Protozoa) in guinea pigs. 26-9.
- BRAND, T. VON, & CULLINAN, R.P. Physiological observations upon a larval *Eustrongylides*; the behavior in abnormal warm-blooded hosts. 29-33.

6. Biology; Embryology

Biol. Bull., 1943, 84:

- DAY, M.F. The function of the corpus allatum in muscoid diptera. 127-40.
- ROMANOFF, A.L., & HAYWARD, F.W. Changes in volume and physical properties of allantoic and amniotic fluids under normal and extreme temperatures. 141-7.
- BRAND, T. VON. Physiological observations upon a larval *Eustrongylides*, influence of temperature pH and inorganic ions upon the oxygen consumption. 148-56.
- HUNGATE, R.E. Further experiments on cellulose digestion by the protozoa in the rumen of cattle. 157-63.
- BROOKS, M.M. Methylene blue, potassium cyanide and carbon monoxide as indicators for studying the oxidation-reduction potentials of developing marine eggs. 164-77.
- COE, W.R. Development of the primary gonads and differentiation of sexuality in *Teredo navalis* and other pelecypod mollusks. 178-86.
- SUMNER, F.B., & DOUDOROFF, P. An improved method of assaying melanin in fishes. 187-94.
- SUMNER, F.B. A further report upon the effect of the visual environment on the melanin content of fishes. 195-205.

Bull. eksp. biol. med., 1942, 14: No.4.

- STERN, L.S. *Treatment of tetanus/ 3-5.
- ENTIN, D.A. Role of vitamin in the pathology and therapy of neurodystrophic processes/ 5-9.
- ROSSIISKY, D.M. Diuretic remedies in folk medicine/ 9-11.
- GLOSMAN, O.S., KASATKINA, N.N., & PLANELIES, H.B. Morphine shock/ 11-13.
- AGALECKAIA, A.W. Data on the cerebro-spinal fluid in hypertension/ 13-16.
- VESELEIN, P.N. Effect of lowered barometric pressure on animals with experimental hypothyreosis/ 16-19.
- BURLAKOVA, E.V. Modification of the polarizing properties of the skin during formation of cancerous growth/ 19-25.
- IVANENKO, E.F., & VOINAR, A.O. Effect of anesthesia on carbohydrate metabolism in the brain according to the analysis of the afferent and efferent blood/ 25-7.
- EFIMOV, V.V., LOKSHINA, E.S., & UTEVSKAIA, L.B. Investigation of the rhythm of sleep and waking; dissociation of body sleep from sleep of the cerebral cortex investigated by action of metabolites of the pituitary in animals/ 28-33.
- GUBAR, V.I. Mechanism in transmission of stimuli from the mucosa of the intestine to its glands. 33-8.

- GUBAR, V.L. /Inhibition of the intestinal glands/ 38-41.
- MARKOSIAN, A.A., & RACHKOV, G.I. /Analysis of the functional significance of acetylcholine in the electron of the central nervous system/ 41-5.
- LAZOVSKAYA, L.N. /Age modifications of respiration of blood vessels/
- VOINAR, A.O., & PAKHAR, E.E. /Age modification of the buffer capacity of the blood serum and the degree of ionization of its proteins/ 48-52.
- DEVIANOVSKY, S.J. /Recent data on the physiology of nutrition of Bombyx mori and Antheraea pernyi as base for rational feeding/ 52-7.
- NATALI, V.F. /Modifications in the ovary of the fish, Poeciliidae, from the effect of roentgenization in experiments with sex metamorphosis/ 57-61.
- OLVIN, I.A. /Do Lepeshkin's necrobiotic rays really exist?/ 61-3.
- TURLYGIN, S.J. /Radiation of micro-waves, $\lambda \approx 2$ mm by the human organism/ 63-72.
- JAURE, H.H., & TURLYGIN, S.J. /Piezo-electricity in the transverse striated muscles/ 72-7.
- MASTIKOVA, O.K. /Modification of certain plasma properties of the infusoria during conjugation/ 77-80.
- *// These marks denote a translation of the Russian text.
- Proc. Soc. Exp. Biol., N.Y., 1943, 52: (Mar.)
- SEEGERS, W.H., & SMITH, H.P. Antithrombic activity of plasma; quantitative interrelationship. 159-62.
- GROLLMAN, A., & HARRISON, T.R. Reduction of blood pressure of hypertensive rats by administration of certain marine oils. 162-5.
- BODILY, H.L., COREY, N., & EATON, M.D. Precipitation and concentration of influenza virus with alum. 165-8.
- CLARK, W.G., STAVITSKY, A., & TSUCHIYA, H.W. Method of producing open skin wounds uniformly infected with staphylococci, suitable for local chemotherapy studies. 168-72.
- SAN CLEMENTE, C.L., & ECKER, E.E. Estimation of the third component (C'3) of complement. 173.
- KIRBY, W.M.W. Development of sulfathiazole-resistant gonococci in vitro. 175.
- BANG, F.B., & HERRIOTT, R.M. Purification of equine encephalomyelitis virus by ultracentrifugation and maintenance of its activity with cysteine. 177-80.
- STEENKEN, W., JR., & HEISE, F.H. Action of promin and di amino-diphenyl sulfone upon tubercle bacilli; antipromin action of p-aminobenzoic acid. 180-3.
- WRIGHTINGTON, M. Effect of organic nitrates on coronary flow. 184.
- GOLDNER, M.G., & HAEREN, A.T. Oral glucose tolerance tests in dogs with intestinal resections. 186-8.
- SANDGROUND, J.H. Detoxication of a substituted phenyl stilbionate in the rat by administration of p-aminobenzoic acid. 188.
- GENGERELLI, J.A. Electrical field of the nerve impulse. 189.
- SELYE, H., & STONE, H. Role of sodium chloride in production of nephrosclerosis by steroids. 190-3.
- LION, K.S. Magnetic susceptibility of beef tendon. 194.
- PAGE, E.W. Response of human pregnant uterus to pitocin tannate in oil. 195-7.
- MORALES OTERO, P., & POMALES LEBRON, A. Differentiation between Brucella melitensis and Brucella abortus by precipitin reaction. 197.
- 1 SAYERS, G., WHITE, A., & LONG, C.N.H. Preparation of pituitary adrenotropic hormone. 199.

MICROFILM COPYING

Army Medical Library
Washington, D.C.

Microfilm copying of the periodical literature of the Army Medical Library was begun by Bibliofilm Service of the U.S. Department of Agriculture in 1936 and continued until September 1940 when an independent service under the auspices of the Friends of the Army Medical Library was established. Due to the expanding needs of microfilm copying for Regular Army and Federal establishments and other calls made upon it in the present emergency, additional equipment and enlarged facilities have been added at public expense. It has now become possible to substitute microfilm copying to a limited extent for interlibrary loans. Microfilms will be sent without charge in lieu of the loan of the books to all accredited medical librarians who prefer them or where books or journals cannot be loaned.

This service should result in a saving for the borrowing librarian since the responsibility for safekeeping and return of the books will be eliminated and no records will be required. The person receiving the microfilm will have no obligation for its return and may retain it for future use.

The total amount of work which can be done on this basis is of course limited by appropriations now available, hence there will be a limitation in the extent of the service, as to quantity. Orders for microfilm copying, except in particular cases, where bulk or commercial work is involved, will not ordinarily be accepted from individuals, but only through libraries, in the same manner as interlibrary loans.

The following postage should be included with each order for microfilm:

| | |
|---|-----|
| Articles totaling up to & including 100 p. send.... | 1½¢ |
| " " " " " 400 p. | 3¢ |
| " " over 400 p. send 4 1½¢ stamps... | 6¢ |

Send orders to:
Photoduplication Service
Army Medical Library
Washington, D.C.

NOTE: The above offer refers only to extract copying from periodicals and does not cover making microfilm copies of entire volumes.

Most of the requests which have so far been received have not been accompanied by the postage mentioned above. Since this service replaces inter library loans which are not granted the franking privilege the microfilms can not be mailed out without the proper amount of postage.
